Cybersecurity analyst with experience in threat hunting, SIEM-based monitoring, incident response support, and cyber investigations. Skilled in alert triage, log analysis, evidence collection, and investigative documentation.

Education

Pennsylvania State University, University Park, PA

August 2024 – Present

Master of Science, Cybersecurity Analytics and Operations

GPA 3.93/4

Vardhaman College of Engineering, Hyderabad, Telangana

Dec. 2020 – May 2024

Bachelor of Technology in Information Technology

GPA 7.55/10

Skills

Cyber Investigations: Alert triage, evidence analysis, timeline development, investigative documentation, case reporting

Threat Detection & Response: Threat hunting, SIEM-based monitoring, log correlation, incident response support

Networking & Analysis: TCP/IP, DNS, HTTP/S, network traffic analysis

Tools: Splunk, Wireshark, Burp Suite, Nmap, BloodHound, ZAP

Platforms: Linux, Windows, Active Directory, AWS

Languages: Python, Bash, PowerShell, Go, Rust

Experience

Cybic - Security Engineer

February 2026 - Present

- Conducted end-to-end cyber investigations involving alert triage, log analysis, evidence collection, and timeline reconstruction to identify insider threat and security risk activity.
- Performed proactive threat hunting across SIEM and enterprise telemetry to detect anomalous behavior and uncover potential data exfiltration or misuse.
- Analyzed network and security events using TCP/IP, DNS, and HTTP/S to identify suspicious communications and support incident investigations.
- Supported SOC and incident response workflows by triaging alerts, escalating actionable findings, and documenting investigative outcomes.
- Produced detailed investigative reports and collaborated with cross-functional stakeholders to support organizational response to insider and cyber-related incidents.

CCSO (PSU)

August 2024 - Present

- Performed blue-team analysis during competitive cyber defense exercises, including alert triage, log review, and investigation of suspicious host and network activity.
- Supported incident response and system hardening efforts in simulated enterprise environments by identifying vulnerabilities, validating findings, and helping restore secure operations.
- Worked in team-based competition settings to analyze attacker behavior, document issues, and communicate remediation priorities under operational pressure.

Certificates and Competitions

Constructing Defense Path, Just Hacking

CompTIA Security+

Google Cybersecurity Professional

NCAE Cybergames - Blue Teaming Competition (2025)

CCDC (2026)

HTB CPTS

- In Progress
